ABOUT ME

Backend-oriented software developer with experience building REST APIs using Node.js and Express. Completed coursework in Systems Engineering with hands-on experience developing full-stack applications, intelligent systems, and educational software.

Experienced in backend API development, database integration, and building scalable web applications using React, Node.js, and SQL databases.

Currently pursuing a Master's degree in Cybersecurity while continuing to develop projects related to backend development, cybersecurity, and software engineering.

WORK EXPERIENCE

Customer Service Agent

24/7 Intouch - Walmart | Oct 2021 – Mar 2022

- Customer support via chat and email
- Problem resolution and CRM management
- Customer refund and compensation assistance

Customer Service Agent

Everise - Humana | Sept 2022 – Jan 2023

- Customer service via phone
- Problem-solving and CRM management
- Life insurance and medical appointment assistance

EDUCATION

Systems Engineering

- Universidad Mariano Gálvez of Guatemala 2021 – 2026
- Completed all coursework

Master's Degree in Cybersecurity

- Universidad Mariano Gálvez of Guatemala 2026
- In progress

TECHNICAL SKILLS

Backend

- Node.js
- Express.js
- REST API Development
- JWT Authentication
- Bcrypt

Frontend

- React
- Vite
- HTML
- CSS
- JavaScript

Database

- PostgreSQL
- Oracle
- MySQL

Programming Languages

- JavaScript
- Python
- C#
- C++

Other Technologies

- Git
- Github
- Unity
- Tensorflow

PROJECT EXPERIENCE

HyperToys

Collaborated in the development of an e-commerce platform for collectible products. Contributed primarily to backend development by designing routes and implementing RESTful APIs using:

- Node.js
- Express.js

Worked on API endpoints for authentication, product management, and communication between frontend and backend services.

<https://github.com/Joliva07/HyperToys>

CyberDetective

Developed an educational 2D game designed to teach cybersecurity concepts through interactive gameplay using Unity.

The project simulates cyber threats such as phishing attacks, DDoS attacks, and ransomware through different mini-games and challenges.
